

REPATRIATION TO CRITICAL CARE CHECKLIST

For patients being transferred back to NHS Scotland please use this standard checklist when confirming information with referring teams. Please ensure clear communication to team who will be receiving and record this information.

1. Name DOB and post code of patient
2. Which ICU and where?
3. IS specialty care required in ICU or general ICU only (Post Code dependent)
4. If Specialty care required (by far will be RIE) accepting Specialty and named Consultant
5. Ensure documentation, clear clinical summary in English alongside full copy of notes (sent electronically or coming with patient)
6. Where appropriate request copies of imaging (physical or online access details)
7. Important to have clear documentation of microbiology too and antibiograms (local micro lab contact details)
8. Book a cubicle, room 16 in RIE in first instance.
9. Ensure Info passed on the clinical teams who might change by time that patients is transferred
10. Ensure NOK details available
11. Confirm with transfer company departure and ETA
