Lothian Critical Care Directorate Guideline for the provision of End of Life Care in Critical Care patients

The following is intended as a guideline to ensure optimal and personalised care is provided to patients for whom withdrawal of life sustaining treatment (LST) is believed to be an appropriate clinical decision. All decisions to provide end of life care must be made by Consultant staff and discussed fully with the patient's family and/or next of kin.

Section A: Recommended actions for Consultant staff

(It may be appropriate for a senior SpR to complete this section but only after discussion with the responsible Consultant)

Action	
Has a discussion with relevant family members been held regarding the indications and decision to withdraw LST and has consensus been achieved?	Y/N
2. Has the above discussion been fully documented in the medical notes?	Y/N
Are there any outstanding issues (including cultural-See link in Section C) which need to be addressed? If yes please provide details in the medical notes	Y/N
4. Is the patient known to have an advance directive regarding end of life care?	Y/N
5. Have the nursing staff involved in the patient's care been fully involved in the discussion?	Y/N
Are they in agreement with this decision?	Y/N
6. Has a DNACPR form been completed?	Y/N
7. Has a detailed entry been made in the notes regarding the mode of withdrawal? This should include details of: Reduction of ventilatory and vasopressor support Whether to extubate the patient What analgesic and anxiolytic drugs will be administered Which drugs have been discontinued instructions regarding artificial nutrition and hydration (ANH)	Y/N
8. Have the nursing staff involved in the patient's care been involved in discussion of, and fully informed of the nature of, the above?	Y/N
9. Has the mode of withdrawal been fully explained to the family? Any decision to withdraw ANH must be fully discussed.	Y/N

If yes: a) Is the patient on the organ donor register?	Y/N
n yeer a, to the patient of the eigen deficit register.	Y/N
b) Has the next of kin been offered the opportunity to speak to a SNOD?	Y/N
c) Has authorisation for organ donation been given?	Y/N
If the answer to 10c is yes, withdrawal of LST should proceed in exactly the same fashion with the exception that the timing and location of withdrawal may be affected.	
11.Has the decision to withdraw support been discussed with the referring team?	Y/N
12.Is it expected that the patient will be discharged to the ward for end of life care?	Y/N
If yes please ensure section B is completed
